Education

BE in Computer Science	KLE Technological University, Hubballi	CGPA: 8.53 / 10	Dec 2021 – Dec 2025
Pre-University Degree	Chetan PU Science College, Hubballi	Percentage: 95%	July 2019 – July 2021
Class X	Guru Nanak Dev Public School, Bidar (CBSE)	Percentage: 95%	May 2018 – May 2019

Experience

Associate SDE | Haegl Technologies Pvt. Ltd. | Contract based | Jun 2025 – Dec 2025

- Assisted in testing and debugging 3+ previously developed websites, identifying and resolving 95% of reported issues.
- Developed a hospital management website (Django, SQLite) for therapists and cerebral palsy patients to track progress and manage data.
- Implemented throttling-based data capture to regulate sensor and analytics event logging, improving system performance and reducing unnecessary data writes

SDE Intern | Haegl Technologies Pvt. Ltd. | Jan 2025 – May 2025

- Assisted senior developers in feature implementation, validation, and quality assurance activities.
- Researched center of pressure and gait analysis (pressure mat) and joint angle assessment (camera-based evaluation), testing models on dummy data with plans for real-world validation.

Data Analysis Intern - Remote | Nature Conservation Foundation (NCF); Bird Count India (BCI) | Jun 2025 – Jul 2025

- Automated scraping and cleaning of 150+ web pages in Python to structure 10 years of birdwatching challenge data.
- Analyzed participant engagement trends and visualized insights using 10+ custom analytical plots to support data-driven reporting.

Projects

Food Distribution System - github.com/Khushi-MA/javaFDS

Skills: Spring Boot, React.js, SQL

- Built RESTful backend services for a food donation platform using Spring Boot and MySQL.
- Implemented core business logic and data lifecycle controls, including validation, request-state transitions, and a scheduled job to purge expired requests, and supported analytics endpoints powering frontend dashboards
- Optimized persistence and API efficiency via JPA mappings, query tuning, and layered architecture

Twitter Sentiment Analysis - github.com/Khushi-MA/Sentiment-Analysis

Skills: Python, HuggingFace, TF-IDF, DistilBERT, NLP, BERT, LLM, ML, DL, Sentiment Analysis

- Developed a sentiment analysis model to classify text-based content which achieved 86% accuracy using DistilBERT, outperforming TF-IDF models (Logistic Regression: 82%, SVM: 83%).
- Published a research paper - *Comparative Analysis of Traditional ML and DL Approaches for Twitter Sentiment Analysis* at ADCIS 2024, BITS Pilani, Goa on Jul 2024 | Springer - [10.1007/978-981-96-3652-5_32](https://doi.org/10.1007/978-981-96-3652-5_32)

Query-Based Sign Spotting in Continuous Sign Language Videos - github.com/Khushi-MA/REUnew

Skills: Python, Computer Vision, Deep Learning, I3D, DTW, Mediapipe

- Designed a query-based sign spotting system to localize specific Indian Sign Language (ISL) signs within continuous video streams using an Inception-I3D 3D CNN and Dynamic Time Warping (DTW).
- Built a complete preprocessing and feature-extraction pipeline using Mediapipe skeletal modeling, grayscale conversion, and data augmentation to improve robustness to signer variability.
- Achieved 57.34 F1-score and 55.27 mIoU on ISLRTC dictionary datasets for precise temporal localization of signs in unsegmented videos.

Skills

Programming Languages: C, C++, Python, Spring Boot, SQL

Tools: Git, GitHub, Microsoft Word, PowerPoint, Excel, Figma, Selenium

Others: Documentation, Leadership, Communication, Team Management, Research Writing
